I strongly urge you to reject NAB's petition 04-160, a measure to restrict the available content to XM Radio's repertoire. I became a subscriber to XM Radio the first day I heard about it. Offering traffic and weather makes it more valuable, but restricting this service will not make me go back to commercial radio. Rather than hogging traffic and weather reports - the only thing that local markets have to offer - perhaps stations should look at ways of improving their content to keep listeners.
